The accompanying notes are an integral part of these condensed interim financial statements.

1. NATURE OF OPERATIONS AND GOING CONCERN

Nature of operations

Tower Resources Ltd. ("the Company") is incorporated under the laws of British Columbia, Canada. The Company trades on the TSX Venture Exchange ("TSX-V") under the symbol TWR. The Company's head office, principal address and registered and records office is located at 912 – 1112 West Pender Street, Vancouver, BC V6E 4J6.

Going concern

The Company's principal business activities include the acquisition and exploration of exploration and evaluation assets domiciled in Canada. The Company has not yet determined whether any of these exploration and evaluation assets contain ore reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production. To date, the Company has not earned any revenues and is considered to be in the exploration stage.

These condensed interim financial statements have been prepared assuming the Company will continue on a going-concern basis. The Company has incurred losses since inception and the ability of the Company to continue as a going-concern depends upon its ability to raise adequate financing and/or to achieve profitable operations. These condensed interim financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

The continuance of the Company's operations is dependent on obtaining sufficient additional financing in order to realize the recoverability of the Company's investments in exploration and evaluation assets, which is dependent upon the existence of economically recoverable reserves and market prices for the underlying minerals. Management closely monitors commodity prices of precious metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company if favorable or adverse market conditions occur. Management estimates it will require additional financing within the next twelve months. Accordingly, these material uncertainties may cast significant doubt upon the entity's ability to continue as a going concern.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies used in the preparation of these condensed interim financial statements.

Statement of compliance

These condensed interim financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards ("IFRS") and International Accounting Standards ("IAS") 34 "Interim Financial Reporting" as issued by the International Accounting Standards Board ("IASB").

This condensed interim financial report does not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual audited financial statements of the Company for the year ended October 31, 2015. The accounting policies applied in preparation of these condensed interim financial statements are consistent with those applied and disclosed in the Company's financial statements for the year ended October 31, 2015.

These condensed interim financial statements were authorized by the Board of Directors on June 29, 2016.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Basis of presentation

The condensed interim financial statements have been prepared on an accrual basis and are based on historical costs, except for certain financial assets which are measured at fair value. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Use of estimates

The preparation of financial statements in conformity with IFRS requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported revenues and expenses during the period.

Although management uses historical experience and its best knowledge of the amount, events or actions to form the basis for judgments and estimates, actual results may differ from these estimates.

The most significant accounts that require estimates as the basis for determining the stated amounts include the valuation of share-based compensation and income taxes.

Critical judgments exercised in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are as follows:

<u>Economic recoverability and probability of future economic benefits of exploration and evaluation assets</u>
Management has determined that exploration, evaluation, and related costs incurred which were capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessment of economic recoverability and probability of future economic benefits including, geologic and other technical information, a history of conversion of mineral deposits with similar characteristics to its own properties to proven and probable mineral reserves, the quality and capacity of existing infrastructure facilities, evaluation of permitting and environmental issues and local support for the project.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in material adjustments are as follows:

<u>Valuation of share-based compensation</u>
The Company uses the Black-Scholes Option Pricing Model for valuation of share-based compensation. Option pricing models require the input of subjective assumptions including expected price volatility, interest rate, and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's earnings and equity reserves.

<u>Income taxes</u>
In assessing the probability of realizing income tax assets, management makes estimates related to expectation of future taxable income, applicable tax opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

New or revised accounting standards not yet adopted

A number of new standards, amendments to standards and interpretations applicable to the Company are not yet effective for the six months ended April 30, 2016 and have not been applied in preparing these condensed interim financial statements. The Company does not expect there to be any changes as a result of the new or revised standards which will be effective to the Company's financial statements for the year ending October 31, 2017 or later:

a. IFRS 9 – Financial Instruments: Classification and Measurement applies to classification and measurement of financial assets and liabilities as defined in IAS 39. It is effective for annual periods beginning on or after January 1, 2018 with early adoption permitted.

5. EXPLORATION AND EVALUATION ASSETS (continued)

JD PROPERTY

On September 7, 2011 (later amended on January 28, 2015), the Company entered into an option agreement to acquire the JD gold - silver property, comprised of certain mineral claims, located in the Omineca mining division of British Columbia. Under the terms of the amended agreement, the Company could acquire a 100% interest in the property by making cash payments of $200,000, issuing 1,875,000 common shares over a 6-year period, in addition to funding aggregate exploration expenditures of $5,000,000 over a total 84-month period as follows:

Date	*Cash Payments*	*Number of Shares*	*Work Commitment*
	$		**$**
September 26, 2011 *(issued)*	-	125,000	-
November 15, 2011 *(incurred)*	-	-	60,000

December 11, 2017	-	350,000	-
December 11, 2018	-	-	1,800,000

The option agreement was subject to a 2% net smelter return royalty ("NSR"), 1% of which could be purchased by the Company for $3,000,000. The Company would be responsible to file the related cash-in-lieu or assessment work documentation with the Province of British Columbia. If the Company earned the 100% interest, it would pay an advance royalty of $40,000 per year until it commences commercial production.

On April 11, 2012, the Company entered into an option agreement to acquire a 100% interest in the Belle property located in the Omineca mining division of British Columbia adjoining the Company's JD property. Under the terms of the option agreement, the Company may acquire a 100% interest in the property by making a cash payment of $14,000 and issuing 150,000 common shares of the Company as follows:

Date	*Cash Payments*	*Number of Shares*
	$	
April 23, 2012 *(paid and issued)*	14,000	25,000
April 23, 2013 *(issued)*	-	25,000
April 23, 2014 *(issued)*	-	25,000
April 23, 2015 *(issued – Note 9)*	-	25,000
April 23, 2016 *(issued – Note 9)*	-	50,000

The agreement is subject to a 2% NSR, of which 1% can be purchased by the Company for $2,000,000.

In March 2016, the Company terminated the JD property option agreement; however, the Company still maintains the Belle property option agreement in good standing. As at April 30, 2016, the Company wrote down the property by $2,513,275 to a fair value of $1.

(Expressed in Canadian Dollars – Unaudited)

5. EXPLORATION AND EVALUATION ASSETS (continued)

BAEZ PROPERTY

This property is located in British Columbia and was acquired for nominal staking costs. During the year ended October 31, 2014, the Company suspended exploration activity related to this property and accordingly, management wrote-down the property to $1.

WATERLOO PROPERTY

On October 18, 2011, the Company entered into an option agreement to acquire the Waterloo property, comprised of certain mineral claims, located in the Osoyoos mining division of British Columbia. Under the terms of the option agreement, the Company may acquire a 75% interest in the property by making cash payments of $70,000 and issuing 400,000 common shares to the vendor, in addition to funding aggregate exploration expenditures of $2,000,000 over a total 42-month period. In May 2014, the Company and the vendor agreed to extend the work commitment due on May 13, 2014 and May 13, 2015 for 24 months as follows:

Date	*Cash Payments*	*Number of Shares*	*Work Commitment*
	$		**$**
December 23, 2011 *(paid and issued)*	45,000	400,000	-
December 23, 2012 *(paid and incurred)*	25,000	-	100,000
May 13, 2016	-	-	700,000
May 13, 2017	-	-	1,200,000

The option agreement is subject to a 2% NSR, of which 1% can be purchased by the Company for $3,000,000. Upon completing and delivering a Feasibility Study, the Company will be deemed to have exercised the second option and to have earned an additional 25% Interest (for an aggregate 100% interest).

Once the Company has earned the 100% interest, it will pay an advance royalty of $40,000 per year until it commences commercial production.

During the year ended October 31, 2014, management wrote-down the property to $1 as the Company suspended exploration activity related to this property. Subsequent to April 30, 2016, the Company did not meet the work commitment of $700,000 due on or before May 13, 2016. The Company is currently in discussion with the optionor to have this work commitment extended.

The Vice-President of Exploration of the Company has an interest in the vendor.

5. EXPLORATION AND EVALUATION ASSETS (continued)

RABBIT NORTH PROPERTY

On July 11, 2013, the Company entered into an option agreement to acquire the Rabbit North property, comprised of certain mineral claims, located in the Kamloops mining division of British Columbia. Under the terms of the option agreement, the Company may acquire a 100% interest in the property by making cash payments of $170,000 and issuing 1,000,000 common shares over 4-year period, in addition to funding aggregate exploration expenditures of $2,000,000 over a total 60-month period as follows:

Date	*Cash Payments*	*Number of Shares*	*Work Commitment*
	$		**$**
June 6, 2013 *(paid)*	5,000	-	-

POPLAR WINSTAR STRACHAN

On December 4, 2006, the Company entered into an agreement to participate in the Winstar Strachan 8-10-38-10 W5M well in the West Central area of Alberta. The Company paid $300,000 to earn an equalization interest of approximately 1.2367 %. During the year ended October 31, 2009, the Company wrote down the value of the property to the estimated recoverable amount of $1.

Rehabilitation obligations of $13,000 (October 31, 2015 - $13,000) have been recorded based on the Company's proportionate share of obligations estimated by the operators of the properties. The estimated values of the obligations have not been discounted as they are immaterial and an estimate of the timing of the future cash flows is not determinable.

7. RECLAMATION BONDS

In relation to the JD and Rabbit North properties, the Company has posted reclamation bonds totaling $55,000 (October 31, 2015 - $60,000). In December 2015, the reclamation bond relating to the Waterloo property for $5,000 was released and refunded back to the Company.

Stock options

On November 19, 2010, the Company adopted an incentive stock option plan (the "Plan"). The Plan provides that the aggregate number of shares of the Company's capital stock issuable pursuant to options granted under the Plan may not exceed ten percent of the issued and outstanding common shares of the Company at the time an option is granted. Options granted under the Plan will have a maximum term of five years. The exercise price of options granted under the Plan shall be set by the Board of Directors on the effective date of the option and will not be less than the Discounted Market Price as defined by the TSX-V. Vesting of the options shall be at the discretion of the Board of Directors.

During the six months ended April 30, 2016, the Company granted nil (April 30, 2015 – 900,000) incentive stock options with a fair value of $nil (April 30, 2015 - $29,261) using the Black-Scholes option pricing model. The Company expensed $1,452 (April 30, 2015 - $41,170) as share-based compensation which was the value of stock options vested during the period.

11. SEGMENTED INFORMATION

The Company has one geographic segment, being Canada, and one operating segment, being the acquisition and exploration of exploration and evaluation assets.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The Company's financial instruments consist of cash, receivables, reclamation bonds, and accounts payable and accrued liabilities. The fair value of these financial instruments, other than cash, approximates their carrying values. Cash is measured at fair value using level 1 inputs.

The Company is exposed to a variety of financial risks by virtue of its activities including credit, liquidity, interest rate, foreign currency and price risk.

Credit risk

The Company is exposed to industry credit risks arising from its cash holdings and receivables. The Company manages credit risk by placing cash with major Canadian financial institutions. The Company's receivables primarily consist of sales tax recoverable due from the Federal Government of Canada. Management believes that credit risk related to these amounts is nominal.

Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient funds to meet its financial obligations when they are due. To manage liquidity risk, the Company reviews additional sources of capital and financing to continue its operations and discharge its commitments. The Company has sufficient cash to settle current liabilities.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. As of April 30, 2016, the Company held demand deposits with a face value of $30,000 (October 31, 2015 - $30,000). A change in interest rates of 1% would change income by $300 (October 31, 2015 - $300) per annum.

Foreign currency risk

The Company is not significantly exposed to foreign currency risk on fluctuations related to items that are denominated in a foreign currency.

Price risk

The Company has limited exposure to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities.

13. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of exploration and evaluation assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital, options and warrants.

The properties in which the Company currently has an interest are in the exploration stage; as such the Company has historically relied on the equity markets to fund its activities. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital restrictions.

14. COMMITMENT

On September 22, 2014, the Company entered into a commercial lease agreement for an office space in Vancouver, B.C. for a term of two years which commenced on October 1, 2014 and expires on September 30, 2016. As at April 30, 2016, a security deposit of $5,894 (October 31, 2015 - $5,894) was paid and included in prepaid expenses and deposits. The annual lease commitment is $30,769 for 2016.
